EXAMINER'S COMMENT

Reasons for Allowance

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including a first decimation filter connected to the first exhaust gas sensor; and a control unit connected to the first decimation filter, the control unit configured to determine a manipulated variable for manipulating the air-fuel ratio so that an output value from the first decimation filter converges to a target value, wherein the first decimation filter further comprises: a first over sampler for over sampling the exhaust gas sensor in a shorter cycle than a cycle determining the manipulated variable; output of the first that is used for a first low-pass filter for smoothing the over sampled value; and a first down sampler for re-sampling the smoothed value in the cycle that is used for determining the manipulated variable to output the re-sampled value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3747

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The copies of U.S Patent are not provided.
